Year 1
Year 2
Year 3
Module 1 · Detection and inventory
Paper 1 submitted
Data curation, labelling, VHR interpretation
Model development and calibration
Accuracy assessment, registry gap analysis
Module 2 · Dynamics and displacement
Paper 2 submitted
Emergence dating and activity indices
Event-study and displacement analysis
Module 3 · River source attribution
Paper 3 submitted
Network construction and sampling design
Field campaigns (dry, wet, dry season)
dry
wet
dry
Laboratory analyses and QA/QC
Attribution modelling and synthesis
Integration and thesis writing
